Subject: FW: A3 file 1 of 4 FW: ADVANCE NOTIFICATION - ORD-030638 Gaballah et al. PFAS Toxicity in Zebrafish

Gail – here's info from Ron Hines, AD who sent forward this Advance Notification record.

My supervisor, Bill Russo, told me not to forward to you that he would do it. Since he did not, and he's now out for several weeks, I am sending and copying Ron Hines in case you have questions. Please see next files.

Thank you.

This work was initiated and completed relatively quickly. When the PFAS shark tank proposals were funded (Tamara did receive any of those funds), Tamara approached me about what essentially was a pilot study that would inform the design and interpretation of the Tier 0 and Tier 1 assays being done with shark tank funds. The data presented provides valuable information on internal dosimetry and categorization of PFAS based on toxicity properties. NCEA, who is working on the 7 PFAS toxicity assessments with OW, was briefed on this work.

To be frank, this is the first I have heard that we need to engage with the program offices on everything we do.

Ron – here's the first in the list of those identified on Bruce's master table as 'no previous EPA partner engagement.'

Megan Fleming told Gail Harris today that she determines whether that 'prior EPA partner involvement' box is tagged 'yes' or 'no' on their master list.

I assume that Megan tagged 'no' on this one because the OW transmittal form says that no OW staff person did prior review of the manuscript, and your email below did not overtly state any other previous partner involvement.

What do we say is the reason for no previous partner engagement? If there was discussion, just not article review, we can say that now and amend their info. If this work came up quickly, or was requested by partners on expedited basis, can we say that?

Thank you.
